

Bearcat TRUNKTRACKER

BASE SCANNERS

High Performance Programmable Scanning Radios

BC 780XLT

- 500 CHANNELS, 10 BANKS, 10 PRIORITY CHANNELS
- CONTINUOUS BAND COVERAGE (25MHz to 1.3GHz)†
- TRUNKTRACKER III (EDACS™, MOTOROLA™, E.F. JOHNSON™)
- ALPHA TAGGING (BANK, CHANNEL AND SEARCH RANGE)
- PC PROGRAMMABLE
- PC CONTROL
- 2 LINE ALPHA DISPLAY
- CTCSS/DCS
- CONTROL CHANNEL-ONLY MODE
- S.A.M.E WEATHER ALERT
- CLONE FEATURE
- AM/FM/WFM MODES
- PRE-PROGRAMMED SERVICE SEARCHES (10)
- RECORD FUNCTION
- BEEP ALERT
- ATTENUATOR
- SELECTABLE STEPS
- BASE/MOBILE DESIGN
- FULL BACKLIT CONTROLS
- FULL-FREQUENCY LCD DISPLAY

BC 895XLT

- 300 CHANNELS
- TRUNKTRACKER (MOTOROLA)
- TRUNK SCAN AND I.D. SCAN LISTS
- TRUNK SEARCH
- ONE-TOUCH WEATHER
- BUILT-IN CTCSS
- 10 PRIORITY CHANNELS
- SIGNAL STRENGTH METER
- AUXILIARY TAPE OUTPUT
- AUTOMATIC STORE
- MANUAL CHANNEL ACCESS
- PROGRAMMABLE SEARCH
- CHANNEL LOCKOUT KEY

UNIDEN SCANNERS WITH TRUNKTRACKER TECHNOLOGY. THE NEWEST SCANNERS FROM THE COMPANY THAT STARTED IT ALL. Whether you are a professional or a hobbyist, Bearcat puts you behind-the-scenes for all the action. With innovative features and advanced design, Uniden base scanners offer you more than ever before. It's just what you'd expect from Bearcat, the industry leader in scanner technology.

BASE SCANNERS

High Performance Programmable Scanning Radios

FEATURES*	BC 780XLT	BC 895XLT
• CONTINUOUS BAND COVERAGE (25MHz TO 1.3GHz) [†] - Allows coverage from virtually every frequency from 25MHz to 1.3GHz excluding the cellular bands and UHF TV band, so you can tune into police, fire, weather, ambulance, aircraft, military, "Ham" radio and much more.	•	
• CHANNELS - Allows you to program each of the memory channels to store one frequency.	500	300
• PREPROGRAMMED SERVICE SEARCHES (10) - This feature allows you to easily search police, fire/emergency, aircraft, marine, railroad, CB radio, news media, Family Radio Service, Ham Radio, and special channel frequencies.	10	
• 2 LINE ALPHA DISPLAY - Allows for alpha tagging display of channel, bank, or search range.	•	
• TRUNKTRACKER III - Search for and monitor all the groups within a specific trunked system. Lockout unwanted groups during the search and save other groups to scan lists (Motorola™, Ericsson™ & E.F. Johnson™).	•	MOTOROLA™ ONLY
• CONTROL CHANNEL ONLY MODE - Allows the user to automatically trunk certain systems by simply programming the control channel.	•	
• S.A.M.E WEATHER ALERT - This feature allows a user to input a six-digit code (F.I.P.S. code) that will designate a localized severe weather warning. This function will only alert the user of impending weather conditions for their specific area code or codes. These codes may be obtained from the "National Weather Service" website.	•	
• BACKLIT FULL-FREQUENCY DISPLAY - Shows the channels being scanned and the frequency entered into each channel with an easy-to-read backlit display for enhanced night visibility.	•	•
• PC PROGRAMMABLE - This feature allows users to program the scanner channels with Uniden proprietary and 3rd party computer software.	•	
• PC CONTROL - This feature allows the user to control the scanner using third party software. Optional baud rates include 2400, 4800, 9600 (default) and 19200 operating through the scanner's DB-9 RS-232C port.	•	•
• CLONE FEATURE - Allows for cloning of another scanner's programmed frequencies. (<i>The two scanner's must be connected by a cloning cable for the cloning process to take place.</i>)	•	
• ALPHA TAGGING - Allows the user to assign an alpha description to each channel, trunking talkgroup and bank.	•	
• CTCSS/DCS - This feature allows the user to assign analog and digital sub-audible tone codes to a specific frequency in memory. The scanner will also search for unknown CTCSS and DCS tones.	•	CTCSS ONLY
• BEEP ALERT - This function allows the user to program any channel with an alert that will let the user know that a transmission has come in on a designated channel. This function can be programmed in all 500 channels if desired.	•	
• RECORD FUNCTION - Allows the user to designate a channel to be recorded by an external device. The user will be able to select between ON and OFF. The default setting is OFF. An icon will appear in the LCD when a channel has been assigned the record feature (requires an external recording device).	•	•
• VFO CONTROL - Allows the user to tune through frequencies, channels, alpha characters and more with the handy VFO tuning knob.	•	•
• MENU-DRIVEN DESIGN - This function allows advanced programming and control operation through the easy-to-use menu system.	•	
• TOTAL CHANNEL CONTROL - Allows the user to program delay, step, mode (adjustable) priority, attenuation and more on a per-channel basis.	•	
• SEARCH PLUS - This function allows the user to program up to 10 search ranges, auto search and store, and chain search.	•	
• TRUNK SEARCH - Search for and monitor all the groups within a trunked system. Lockout unwanted groups during the search and save other groups to scan lists.	•	•
• TRUNK LOCKOUT - Lockout groups you don't wish to monitor, (including data groups) from the trunked system.	•	•
• TRUNK DELAY - Apply a five second delay to trunking groups so that both sides of a conversation can be heard, even if the trunking frequencies change between replies.	•	•
• ONE TOUCH WEATHER - Automatically scans all national weather channels with a single touch.	•	•
• TURBO SCAN - This lightning-fast technology allows you to scan and search nearly 100 channels or steps per second.	•	•
• MEMORY BACKUP - Retains frequencies entered for more than 3 days without batteries or during a power failure.	•	•
• PROGRAMMABLE SEARCH - Allows you to find new frequencies in any of the bands.	•	•
• MANUAL CHANNEL ACCESS - Go directly to any channel without stepping through other channels.	•	•

*Specifications and features are subject to change without notice. †Excluding the cellular bands and the UHF TV Bands. Covered under one or more of the following U.S. patents:

4,398,304	4,409,688	4,455,679	4,461,036	4,521,915
