

## UBC800XLT desktop/mobile radio receiver

State of the art mobile scanner, with many features. Includes 6000 dynamically allocated channels, location based scanning, "close call" to instantly tunes to nearby signals, GPS input, and trunk tracker mode. The UBC800XLT can be easily mounted in a vehicle either with the supplied mobile mounting bracket or directly into a DIN-E standard single slot (standard car radio fitting). The keypad and display are backlit for easy viewing, with variable brightness and the facility for headlamp dimming..... plus many other user friendly features.
